

Sahil Garg

Senior Flutter Developer

📞 +91-8901119226 — ✉ sahilgarg8901@gmail.com — 🔗 LinkedIn

Senior Flutter Developer with over 5 years of experience building scalable, cross-platform mobile applications using Flutter. Proven track record in delivering complex UI features, leading teams, mentoring juniors, and working closely with clients to craft user-centric solutions. Comfortable across mobile and web, with brief experience in React + TypeScript. Seeking new challenges where I can apply my skills, knowledge, and experience on impactful projects as a Senior Software Developer.

Tech Skills

- **Languages:** Dart, Kotlin
- **Mobile:** Flutter (Expert)
- **Web:** React with TypeScript (Basic)
- **State Management:** BLoC, Provider
- **Databases:** Firebase, SQLite, NoSQL
- **Tools & Platforms:** Git, VS Code, Android Studio, Figma (basic), REST APIs, Firebase Auth/Firestore
- **Other:** Backend-driven UI, Custom animations, Analytics, Crashlytics, App launch processes for Play Store & App Store, Multi-threading, Flutter Background Service

Work Experience

GeekyAnts, Bangalore

Oct 2022 – Present

Senior Software Engineer - I

- Led a team of 3–4 Flutter developers in multiple projects involving complex UI development and API integrations.
- Conducted interviews, mentored interns, and handled onboarding, task allocation, and code reviews.
- Built a calendar-based event scheduling app with UI + voice command support using Gmail and Outlook APIs.
- Designed and implemented a file upload system for Gmail attachments entirely from scratch.
- Collaborated with clients to provide architectural input and deliver scalable, production-ready solutions.

Software Engineer

Oct 2020 – Sep 2022

- Delivered full-cycle feature development including UI design, API integrations, database interactions, and state management (BLoC/Provider).
- Built modular codebases across 6+ Flutter projects with varying complexity.
- Recognized for clean development practices, quick turnaround, and effective collaboration.

Trainee Software Engineer

Jan 2020 – Sep 2020

- Trained in Flutter and contributed to small and mid-scale features in ongoing production apps.
- Developed solid foundational understanding of mobile architecture and cross-platform development.

Projects Overview

1. AirOps – Aviation Employee App

Flutter (Provider) — Android/iOS

Built for aviation companies with role-based workflows for pilots, engineers, and admins. Features include PDF viewing, digital signatures, image compression, and automated form filling.

2. Cera – Crisis Management System

Flutter (Mobile & iPad) + React + TypeScript (Web)

A platform to help responders (police, medics, teachers, students) coordinate during active threats through real-time updates, geofencing, video calls, and location tracking.

Key Contribution: Led front-end development of the web dashboard in React.

3. Omega (IAM+) – Voice-Controlled Super App

Flutter (BLoC)

A multifunctional mobile app integrating a voice assistant for booking (hotel, movie, flight), email/calendar sync, alarms, news, and entertainment.

4. Unojobs – Job Matching Platform

Flutter (Provider)

App offering job recommendations using profile matches, filters, geolocation, and analytics for match potential.

5. Projense – Backend-Driven ERP Web App

Flutter Web

Backend-driven ERP UI for order supply chain management where all screens and widgets were generated dynamically using server-driven schemas.

Education

B.Tech in Information Technology & Engineering

NIET, Greater Noida

2016 – 2020

Achievements

- Top 10 — Rajasthan Hackathon (2018)
- Runner-up — B'VEST (2017)
- Hosted 12-hour Hackathon & Smart India Hackathon (2019)
- Winner — College Badminton Championship (2017)
